

**“Unique selling point for unparalleled quality assurance”**

The rlc packaging group is a highly specialised packaging manufacturer with 150 years of company tradition and the power for innovation. With the Pharmacenter, the international group has specialised on the specific needs of the pharmaceutical industry. Here, packaging and package inserts are produced under the strict hygiene and reliability requirements of the pharmaceuticals industry. The company is also certified to pack drugs in primary packaging.

Frank Golldack is the Quality Manager of the Pharmacenter and demands certainty in his production processes. “Before, the production process was geared towards quality with the picking of random samples, now we use 100% inspection. This is the standard set by ourselves and our customers, who are not very tolerant as regards imperfections.” He adds, “Inspecting the print against the PDF of the customer is a central function because it eliminates confusion of versions.”

Patrick Klewitz is production manager of pharmaceuticals and highlights a particular feature. "In roll-to-roll printing, we are not able to extract misprints directly. This is why, together with Vision Experts and the machine manufacturer, we developed the marking of erroneous ups. When the inspection system detects flaws in the print process, the pharma code of the up in question is invalidated and automatically rejected in the fold process. This unique selling point enables us to attain unrivalled quality assurance."

CEO Hans-Jürgen Katzer is happy. "Beyond the inspection of package inserts with Vision Experts, we have also equipped our new machines in the folding carton production area with the same inspection system. With the inspection systems from Vision Experts, we are very close to our goal of comprehensive quality control from the very beginning of the process."

## About Vision Experts

Vision Experts GmbH is a specialist in 100% inspection of premium-quality print products. All solutions are tailored to the needs of our customers. We are amongst the leading suppliers - with over 300 installations for 100% print inspection in 15 countries.

Our solutions are working in web and sheet-fed printing machines, and for converting equipment. Our list of customers includes leading printing machine manufacturers, international packaging manufacturers and medium-sized businesses.
